Celebrating the Core in Practice, Quality, and Leadership

This year's conference will celebrate our KP Caring Science journey and we invite you to share your story, art expression, team project, quality improvement initiative, and research findings that have enhanced the caring-healing nature of our work. All forms of artistic and scientific expressions are encouraged. By sharing our best practices and insights we benefit from learning how to care for ourselves, our health care teams, and our patients and families in our community.

Share your story and join us at the 2016 Caritas Consortium!

Helpful tips:

- Online submission is simple!
- All ideas are good ideas and just waiting to materialize!
- Share your submission idea with your manager or department. They have great suggestions to add to your proposal and can provide resources
- We have a regional team that is available to support you through the process
