

# 2026 KP Northern California Professional Governance Workshops

The Kaiser Permanente Northern California Professional Governance workshops are **interactive training sessions designed to build shared leadership models where nursing professionals have a voice in the decisions affecting their practice.**

Through **engaging discussions and critical analysis of selected texts**, specifically crafted by Tim Porter O’Grady - participants will deepen their understanding of professional governance, enhance their leadership skills, and improve their ability to advocate for quality patient care!

These **8-hour in-person workshops will be held across the region** to provide the following key learning objectives:

- Explain the evolution and purpose of professional governance
- Describe the core principles of professional governance
- Identify governance structures, roles, and responsibilities
- Apply evidence-based and transparent decision-making processes
- Evaluate the effectiveness of professional governance
- Analyze strategies for sustaining professional governance

Join our nursing research study on how these Nursing Professional Governance workshops support meaningful professional development for nurses involved in NPG at KP NCAL. *Participation is voluntary.*
