

Caring Science in Action

The Clinic (Re)Brilliance In-Person Workshops

(Re)Brilliance

Remembering and honoring the brilliant and resilient human beings we already are.

The (Re)Brilliance Workshops are designed as an artistic experience for nurses to feel seen, heard, and cared for. Through play, movement and the arts, nurses connect to themselves and others as they redefine resilience and experience a deep sense of community and care.

Ultimately, we are celebrating and honoring our collective humanity as we lean into the brilliant and resilient nurses we already are.
