Provider approved by the California Board of Registered Nursing, Provider Number 2365, for 1 contact hour. KP California nurses only.

This presentation will provide a broad understanding of Diabetes Management (DM) and its potential complications from the perspective of specialty experts/a panel group including Endocrine, Cardiology, Nephrology, Ophthalmology, Neurology, Vascular and Podiatry, and Pharmacy.

Objectives

- Describe the prevalence of DM and evidence indicated by reviewing public health data
- Recognize various potential DM-related complications
- Increase awareness of potential DM-related complications
- Apply learned knowledge to enhance patient care
