California nurses only*

Join us for an engaging Grand Rounds session dedicated to revolutionizing the management of systolic heart failure within our integrated health system.

By the end of this session, participants will be able to:

- Analyze the latest medical therapies for systolic heart failure to assess their efficacy and suitability within an integrated health system.
- Evaluate recent outcome data in heart failure care to identify trends, successes, and areas needing improvement.
- Apply updated medical therapy guidelines and strategies to clinical practice, enhancing patient management and care delivery for those with systolic heart failure.

Whether you're a cardiologist, primary care physician, nurse, or healthcare administrator, this session will equip you with the knowledge and tools necessary to transform heart failure care and improve patient outcomes in our community.
