## RIA Grand Rounds: Improving Safety and Continuity in Pediatric Blinatumomab Therapy

**February 24, 2026**

3 – 4:00 p.m. PST

Join us for a virtual webinar that explains how blinatumomab is given to children with leukemia. This session will review common challenges with continuous IV infusions and show how IV securement devices can help prevent disconnections, improve safety, and keep treatment on track.

**Speakers:**

Caroline Hu, MD  
Rebecca Lemons, RN, MSN, BMTCN, CPHON  
Erica J Przybylski, RN, BSN, CPN

**Scan to register**

Register Now: [Register Here](#)

By the end of this session, participants will be able to:

- **Learner will understand administration of the blinatumomab in pediatric leukemia patients.**
- **Learner will understand the challenges of continuous infusions for pediatric oncology patients.**
- **Learner will understand the process of implementing securement device to mitigate disconnection issues.**

*Provider approved by the California Board of Registered Nursing, Provider Number 2365, for 1 contact hour. KP California nurses only.*
